

'LEAD THE RACE'
Great Sauk Trail Council Camporee
October 5-7, 2007
Michigan International Speedway

Did you hear the GSTC Council Camporee in 2007 is going to be at Michigan International Speedway? We will be looking at everything that it takes to 'Lead The Race' from the technology behind those racing machines, to the actual operation of an International Speedway, to the physical and mental abilities a driver requires.

This event is big enough to bring in some activities that normally do not appear at a local camporee. There will be a Saturday Program for Cub Scouts and their families, featuring BB Gun Range, Archery, and Rocketry. The Boy Scouts will be using their bicycles in all kinds of races throughout the weekend; plus race RC Cars on an off-road dirt track. Venturers will participate in a Road Rally and an impaired driving simulator. And everybody will get to explore the two midways of other fun activities.

The Speedway is huge; there is lots of room for camping. Cub Scout Families will also be able to reserve a campsite to extend their weekend experience. Boy Scout Troops and Venturing Crews will have plenty of space to campout for the weekend as we are having several large sub camp areas. In this giant tent city you will meet other scouts from all over Lower Michigan, Northern Ohio, and Eastern Indiana. Bring your patches to trade.

Information packages are available on the Camporee Website. We will have several surprises to enhance the weekend experience, so sign up for the monthly email updates to get all the inside information, Early Bird Registration Perks, and when to Start Your Engines.
